financial report first quarter 2013

Helgeland Sparebank,

Accounts first quarter 2013

General information

Helgeland Sparebank is a traditional bank- and finance institution. The bank has 16 offices in 14 municipalities in the Norwegian region of Helgeland. It is the 12th largest savings bank in Norway.

The HSB group includes Helgeland Sparebank and the consolidated subsidiaries Helgeland Boligkreditt AS, ANS Bankbygg Mo, AS Sparabankbygg, Helgeland Sparebanks Eiendomsselskap AS and Helgeland Utviklingsselskap AS. The bank owns 48% of Helgeland Invest AS, 43% of Storgata 73 AS and 34% of Eiendomsmegleren Helgeland AS. The results from the associated companies are incorporated into the banks corporative results corresponding to the banks share of ownership.

The accounts are conducted in line with IFRS, hereunder IAS 34 with regards to interim reporting. All numerical quantities are affiliated to the HSB group. Numerical quantities in brackets apply to the corresponding period last year. The periodical accounts have not been audited.

Main features so far this year (HSB group)

- Profit before tax MNOK 51 (MNOK 42)
- Further strengthening core operations in the quarter
- Increased Net interest
- Low write-downs on lending.
- Increased deposit coverage during the quarter

As of 31.03.13 the return on equity was 8.4% (7,2) and the result per equity capital certificate (ECC) was NOK 1.5 (1.2)

Key figures as of 31.03.13:

- Net interest 1.55% (1.46)
- Operating costs 0.96% (1.03)
- Write-downs on lending 0.10% (0.12)
- 3-month growth in lending 1.3% (1,6)
- 3-month growth in deposits 2.2% (1.7)
- Tier one capital adequacy 13.1% (13.6)
- Core tier one capital adequacy 11.4% (11.6)

The net interest

Net interest income was strengthened through 2012 and increased from 1.54 % in the fourth quarter of 2012 to 1.55 % in the first quarter of 2013. The guarantee fund fee is then charged with 5 points.

Net interest and commission income was MNOK 95, compared with MNOK 84 the first quarter of 2012. This is an improvement of MNOK 11 and is due to declining borrowing costs and repricing on parts of the lending portfolio in the corporate market.

The Bank has approved interest rate changes on the current lending portfolio, both for personal-and corporate customers. Lending rates in the personal market will be increased by up to 30 basis points and in the business market by 50 basis points. The changes will take full effect from the month of May, and will give a positive contribution to net interest income in the second quarter.

Net income from commissions

Net income from commissions was MNOK 17 (16). The Bank has maintained the level on commissions both in NOK and percentage. The volume in the insurance portfolio has now reached the corresponding level to what the bank had previous to the change of insurance supplier 01.01.2011.

Net change in value and profit/loss on financial instruments

There are posted NOK 3 million as income in the first quarter of 2013. Compared to 31.03.12 the income is reduced with NOK 2 million. The largest effect of the positive development of the bank's financial instruments in the quarter is put over equity. This emerges as positive change in value under the extended income statement with NOK 11 million.

Operations costs

The HSB group has cost-effective operations. Total annual operation costs were NOK 59 million, which is equal to the first quarter of 2012. In per cent of average bank total assets, ordinary operations costs constitute 0.96% (1.03). The relative figures for ordinary costs measured in per cent of revenues were 50.9% (55.1).

The number of staff in the HSB group and the bank is 177 annual positions, and is unchanged from 2011. Absence due to sickness is low, and ended with a combined absence of 4.3% the same level as in 2012,

Write-downs posted as expenses on commitments

There are posted low write-down expenses in the first quarter, a total of NOK 6 million, which is the same as 2012. Write downs on groups of lending are the same as last quarter. The write-downs posted in the income statement constitute 0.1% (0.1%), in per cent of gross lending.

Equity capital certificate (ECC) - HELG

The ECC capital makes up NOK 935 million and is distributed on approximately 2,050 owners. Note 19 shows an overview of the 20 largest ECC owners. In February the bank announced an impairment of the face value on the equity certificates. The equity share capital will be reduced by MNOK 748 from 935 to 187 by changing the ECC face value of NOK 50 to NOK 10. The reduction amount will be allocated to the share premium account. The ECC holders' total capital is not affected and remains unchanged. The write-down is done to increase the HSB group's flexibility. The quotation for HELG was NOK 40,50 as of 31.03.2013 an increase on NOK 9,5 since 2012.

Balance sheet developments

In the last 12 months the bank total assets have increased with NOK 1,739 million, or 7.5%. The growth is mainly growth in lending.

Commitments

By the end of the quarter gross lending made up NOK 20,096 million, of this 83.2 % to customers in the Helgeland region. In the HSB group's lending volume, NOK 4 756 million goes in as transferred to the mortgage company, Helgeland Boligkredit AS, which is a fully owned subsidiary.

Lending has increased with NOK 1,665 million, or 9.0% (9.3) in the last 12 months. The HSB group has a lending growth to the personal market of 11.7% and a growth to the corporate market of 4.7%. Growth in housing prices and, combined with high activity in the property market have given a growth in the personal market that has stayed above the credit growth in Norwegian households. The housing prices in the Helgeland region have historically had a weaker development than the country as a whole, and prices per square metre are still at a lower level.

Total lending growth is reduced, and in the first quarter down to 1.3 % compared with 1.6 % in the first quarter last year. The share of loans to

households has increased, accounting for NOK 12.8 billion, or 63.9 % (62.4)

New stricter capital requirements are increasing the need for adjustments and capital efficiency

measures. The HSB group has signalled slower growth in 2013, including relief of loans to the corporate market through concrete measures. The HSB group pursues an overall lending growth by the end of 2013 of 5%.

Net non-performing and doubtful loans are reduced and constituted MNOK 120 (162), equivalent to 0.6 % (0.9) of gross lending.

Deposits by customers

In the last 12 months deposits have increased with NOK 850 million, or 8.0% (5.4). The deposit growth from personal customers increased with 9.4%, while deposits from corporate customers increased with 5.5%. Of total deposits at NOK 11.5 billion, NOK 7.5 billion or 65.5% are deposits by personal customers. The HSB group has a stable and local depositor group, whereof 91.7% are deposits from customers in the Helgeland region.

The deposit-to-loan ratio as per 31.03.13 was 57.0% (57.5) in the HSB group and 76.2% (74.9) in the paternal bank. The Deposit ratio is improved from 56.5% as at 31.12.12 to 57% as of 31.03.13. The Bank has implemented a number of measures to strengthen the deposit ratio through focus on deposits and long-term savings.

Borrowing from the debt capital market and liquidity reserves

Moderate growth prospects globally keep the general level of interest rates at record lows. Central banks provide the banking system with enough liquidity in order that capital markets work satisfactorily, although there are still many unresolved problems, especially in the Eurozone. The bank's borrowing costs continued to decline with lower interest rates and lower credit spreads. This applies for funding in the senior market as well as for mortgage companies. However, the decline in credit spreads has been relatively larger in the senior market. The difference between senior finance and covered bonds are now just 50 bp in the 5-year segment.

The HSB group has good and long term funding with good diversification between different sources of funding. By the end of the quarter the share of borrowing for more than a year was 79.9% (77.6), and long term funding in per cent of illiquid possessions (liquidity indicator 1) constituted 107%. Helgeland Boligkreditt AS is an important source for funding and the

arrangement of approved mortgages for transaction to Helgeland Boligkreditt AS gets much attention.

The emphasis of the HSB group's liquidity reserves in the form of interest-bearing securities

are placed in covered bonds, government-, municipality-, finance- and industry bonds. Combined duration on the interest portfolio is 2.0 years (1.9). The HSB groups combined liquidity reserves (cash, bank deposits, and interest-bearing securities) constitute NOK 3.9 billion, or 16% of the HSB group's total bank assets. The HSB group will make a gradual adaptation to the coming new liquidity requirements in Basel III (LCR and NSFR).

Risk conditions

The HSB groups combined risk is managed by warrants, goals and frames determined by the board of directors. The bank's liquidity situation is considered secure, and the share of long-term funding is well above target figures.

The development in the bank's credit risk is followed closely, i.a. through use of quality class analyses for each and all personal customers based on new commitments per quarter and development in the combined personal market portfolio. Business customers are followed up closely individually in addition to monitoring of development in risk based on the bank's score models per region and responsibility area, together with significant industries. Monitoring of development is established in relation to approved management goals for the portfolio.

The HSB group's core tier capital ratio is $11.4\,\%$ (11.6), which is well above the minimum requirement of ft 9%. The core capital adequacy ratio was $13.0\,\%$ (13.3) and total capital adequacy $13.1\,\%$ (13.6). The share of profits year to date have not been included in the figure.

The group has a strong focus on meeting the upcoming new capital requirements in the CRD IV. Initially, the group plans to strengthen core tier one capital by building capital over operations through enhanced core operations. In addition, reduced lending growth, high focus on risk-weighted asset and reduced dividends are relevant instruments.

The bank aims to strengthen its capital adequacy ratio imposed in 2013 by a subordinated loan. Authorisation for borrowing up to MNOK 300 has been given from the bank's board of trustees.

Future prospects

The onshore oil activities in the Helgeland region directed to the fields in the Norwegian Sea increases. Aker Solutions will start building subsea equipment for the Statoil field Aasta Hansteen in Sandnessjøen. Wasco Energy has established in the town of Mo i Rana to complete pipelines to Aasta Hansteen. A record size contract has been given to Momek in Mo i Rana to provide suction

anchor to Aasta Hansteen, Increased uncertainty in the global economy may also affect the oil and gas sector in our region.

The trend in the Norwegian business environment and Helgeland is a clearer dichotomy. The onshore oil activity increases with new activity, while the export-oriented industry is struggling with a high exchange rate and difficult market conditions as expected. This also applies to the steel enforcement industry in Mo i Rana and the aluminium industry in Mosjøen, but long-term and stable owners contribute to stability.

The aquaculture industry is the exception with high demand and high prices. The marine food manufacturer Salmus in Leirfjord has discontinued operations and facilities / licenses have been acquired by the fish farmer Nova Sea at Lovund.

The National Transport Plan has given the start signal to the full upgrading of E6 through Helgeland starting in 2014. The airport in Sandnessjøen will be expanded and the construction of a new major airport in Mo i Rana gets a positive review. The financing of the airport in Mo i Rana will be a topic when the white paper on Avinor is expected to be processed in the Parliament before the summer.

Campus Helgeland is being completed and ready for occupancy during the fall. The NOK 250 million college facilities will accommodate decentralized education offers within fields such as management and finance, technology management, IT, engineering, teaching, nursing and documentation science. Helgeland Sparebank has been involved in funding PhD students and research.

The bank's core operations are further enhanced through increased net interest income in the last quarter. Forecasted rate increase on the total loan portfolio will strengthen net interest rate with full effect from the month of May. Work with differentiated risk pricing of loans continues and commission income is expected to have a slight upward curve. Sales of leasing and insurance products are a success and amplify, together with the Bank's affiliated

REPORT OF THE BOARD OF DIRECTORS

real estate company, the bank's position as a regional finance institution. New savings products and continuous focus on deposits from customers are expected to provide increased deposit coverage. This, together with facilitation of loans for transfer to Helgeland Boligkreditt AS contributes to the HSB group's long-term financing. The low cost levels reflect the efficient operations, and the strength of the

lending portfolio suggests that the low levels of write downs on lending will be continued.

NOTE 1. ACCOUNTING PRINCIPLES

Both the consolidated financial statements and the Parent Bank's separate financial statements have been prepared in compliance with IFRS, while the accounting policies applied in individual areas are described in the annual financial statements for 2011. The interim report for the second quarter is in compliance with IAS 34 and has not been audited.

NOTE 2. SEGMENT

The Group has defined its geographical segment as a main area of Norway – Helgeland. The Group's exposure to credit risk is mainly concentrated on this area. The Group only has smaller exposure to credit risk in areas other than its geographically defined main area. Helgeland is the home region of the Parent Bank who is the Group's operating company.

The group has split the bank into two segments, corporate and retail banking.

The group has split the bank into two segments, corporate and retail banking:
