5. Definitions in connection with section 1.2 "tax liability"

A) Tax liability in Norway vs. abroad:

Persons who live in Norway or stay in Norway for more than 183 days over a 12-month period or more than 270 days over a 36-month period are deemed to be resident in Norway for tax purposes and thus liable to tax in Norway. A person may be resident for tax purposes in several countries, based on the laws and rules in each country.

B) When is a person liable to tax in another country?

Tax liability is assessed primarily based on tax residence (where you live or stay). However, every country has its own rules for how tax residence is determined. Information on the rules for tax residence in individual countries is available on the OECD website.

If you are unsure how tax residence is determined, contact a tax adviser or a local tax office.

C) Tax identification number (TIN):

A Tax Identification Number (TIN) or equivalent number is a unique combination of letters and/or numbers issued by a country to a person. This is used to identify the person in connection with tax reporting. Not all countries issue such numbers and some have different types of number or method for identification for tax reporting.

Examples of tax identification numbers for private individuals:

Denmark: CPR-number	Sweden: Personal identity number or coordination number
Norway: Personal identity number or D number	USA: Social Security Number

More detailed information on the various TINs is available on the OECD website
