SpareBank 1 SR-Bank ASA

Update to credit analysis following rating action

Summary

[SpareBank 1 SR-Bank's](#) (SR-Bank) long-term deposit and senior unsecured debt ratings of A1 and the junior senior rating of Baa1 take into account the bank's baseline credit assessment (BCA) of baa1, and our forward-looking loss given failure (LGF) analysis. For the deposit and senior ratings this results in a three-notch uplift from its BCA while the junior senior rating do not benefit from any uplift. SR-Bank's ratings do not benefit from any government support.

SR-Bank's BCA of baa1 reflects the bank's good long-term financial performance through the cycle, its solid regional market position, strong capital buffers with a Tangible Common Equity (TCE) ratio of 19.3% as of 30 June 2022, and robust liquidity position. These strengths are balanced against the bank's limited geographic reach and some credit-risk concentrations in more volatile sectors, such as oil and offshore and commercial real estate. The bank's has decreased its problem loans ratio to 1.3% at 30 June 2022, down from 1.7% at end-June 2020, and we expect it to improve further as restructurings in the oil and offshore sector continue.

Furthermore, the BCA also incorporates the bank's relatively high dependence on market funding. While this is a common feature among Norwegian banks, it is one that leaves them vulnerable to changes in investor sentiment.

Exhibit 1

Rating Scorecard - Key financial ratios

These are our Banks methodology scorecard ratios. Asset risk and profitability reflect the weaker of either the three-year average and latest annual figure. Capital is the latest reported figure. Funding structure and liquid resources reflect the latest fiscal year end figures.

Source: Moody's Financial Metrics

Credit strengths

» A comfortable capital buffer provides protection from current and future credit losses

- » Good market position in its home regions
- » Good capital generation capacity with a resilient recurring pre-provision income

Credit challenges

- » Exposures to the more volatile sectors commercial real estate and oil and offshore pose risks and increase Non performing loans (NPLs) and impairments
- » Reliance on market funding renders the bank vulnerable to fluctuations in investor sentiment

Outlook

SR-Bank's positive outlook reflects its improving fundamentals in terms asset risk through a reduced exposure to the oil and offshore sectors which will improve the bank's asset risk and stabilise its profitability. The outlook also reflects the bank's increased focus on using deposits as a funding source which reduce the bank's dependence on market funding. If sustained, this creates positive rating pressure.

Factors that could lead to an upgrade

The bank's ratings could be upgraded if it sustains: (1) improvements in its asset quality, problem loans ratio in line with local peers; a low exposures to more volatile sectors including as oil and offshore; or increased geographical or sector diversification; (2) its deposit funding franchise and strong liquidity; and (3) a stable earnings generation

Factors that could lead to a downgrade

While the positive outlook implies that a downgrade is unlikely, the outlook could be stabilised should: (1) SR-Bank's problem loans ratio increase, well above the average of its similarly-rated peers; or the bank's risk profile increases, for example as a result of increased exposures to more volatile sectors, (2) Financing conditions become more difficult, or (3) a reduction in the volumes of loss absorbing liabilities protecting creditors and depositors in case of failure

This publication does not announce a credit rating action. For any credit ratings referenced in this publication, please see the issuer/deal page on <https://ratings.moody.com> for the most updated credit rating action information and rating history.

Profile

SpareBank 1 SR-Bank is the leading financial group in southern and western Norway and the fifth-largest bank in Norway in terms of consolidated assets. As of end-June 2022, its consolidated total assets were around NOK319 billion (€31 billion). The bank is the largest among the SpareBank 1 alliance banks.

The SR-Bank financial group provides a range of products and services, including traditional banking services such as loans, insurance and savings products, as well as securities trading, accounting services, and estate agency services for retail as well as corporate customers.

Recent developments

On 15 June 2022, SpareBank 1 SR-Bank ASA announced a strategic partnership agreement with Swedbank. SpareBank 1 SR-Bank ASA is taking over an approximately NOK 5.6 billion corporate customer portfolio from Swedbank and entering into a partnership for syndication and collaboration with regards to larger corporate clients. The banks will collaborate on transnational corporate customers in Sweden and Norway. Furthermore, the banks will jointly manage larger corporate customers in the Norwegian market through collaboration and syndication within defined industries. The agreement requires the approval of the Norwegian FSA and the Norwegian Competition Authority.

On 22 June 2022, SpareBank 1 SR-Bank ASA announced it will increase its stake in SpareBank 1 Markets AS to 33.34% from 5.57% and transferring its activity in SpareBank 1 SR-Bank Markets to SpareBank 1 Markets which will also be further strengthened by absorbing the markets operations of SpareBank 1 Nord-Norge. This transaction reflects the SpareBank1 group's increased focus on domestic capital markets. The transaction is subject to the approval of the authorities, including the Norwegian FSA and the Norwegian Competition Authority. Assuming the necessary approvals are forthcoming, the transaction will be completed on 1 January 2023 and will have a positive effect on SpareBank 1 SR-Bank's pretax profit of NOK 421 million.

Norges Bank increased the reference rate by 50 bps in September 2022, resulting in a reference rate of 2.25% as of end-September 2022, while indicating that further rate hikes will occur in 2022 and 2023. The counter cyclical buffer (CCyB) requirement has been increased from 1.5% currently to 2.0% by the end of December 2022 and to 2.5% effective from 31 March 2023.

Russia's invasion of [Ukraine](#) (Caa3 NEG) and the economic sanctions that the US (Aaa stable), European governments and other allies have subsequently imposed on Russia have increased risks to the global economic outlook. Heightened geopolitical risks are unambiguously negative for economic activity. The magnitude of the effects will depend on the length and severity of the crisis.

Norway's trade flows with Russia are very limited as they export the same type of goods with the production of oil and gas among the most significant to the Norwegian economy. As European countries are looking to reduce imports from Russia, Norway is likely to be positively affected by increased demand in Europe.

Detailed credit considerations

Norway's 'Very Strong-' Macro Profile remains supportive towards the bank's stand alone credit profile

SR-Bank operates only in Norway and thus its operating environment is reflected through the 'Very Strong -' Macro Profile we assign for Norway. Norwegian banks benefit from operating in a wealthy and developed country with very high economic, institutional and government financial strength, as well as a very low susceptibility to event risk. Norway has a diversified and growing economy, which demonstrated resilience to the weakening in the oil sector in 2014-15 as well as in 2020.

The main risks to the banking system stem from the high level of household debt, elevated real estate prices and domestic banks' extensive use of market funding. However, these risks are mitigated by the strength of households' ability to service debt, banks' adequate capitalisation and the relatively small size of the banking system compared with the total size of the economy.

Nonetheless, we expect the Norwegian mainland economy (excluding any oil-related activity) to expand by 3.6% in 2022, down from 4.2% in 2021. Unemployment rose to around 10.6% in March 2020, but falling back to 1.6% as of 31 August 2022, below the pre-pandemic level.

Exposures to the more volatile oil and offshore sectors pose risks and increase NPLs, although the bank's overall asset quality is still strong

We consider SR-Bank's asset quality to be strong and improving, with an NPL ratio now back to pre-covid level (see Exhibit 3). Reported Stage 3 loans and financial commitments accounted for 1.4% of gross loans as of end-June 2022, down from 1.5% at 31 December 2021. SR-Bank's Moody's adjusted problem loans ratio was 1.3% as of end-June 2022 stable from 1.3% at year-end 2021. Following an initial rise in NPLs a result of the pandemic, the bank's stock of problem loans has decreased over the last few quarters as activity in the oil and offshore sectors has picked up, a sector with a historically high ratio of non-performing loans.

Exhibit 3

SpareBank 1 SR-Bank's reported problem loans and commitments in NOK thousands

Note: These are figures as reported by the bank. Problem Loans % Gross loans ratio includes financial commitments and loans transferred to Boligkreditt and Naeringskreditt where applicable.

Source: Company reports and presentations, Moody's Investors Service

SR-Bank has gradually decreased its exposure to the oil & gas and shipping sectors, but it nevertheless remains higher than most Norwegian banks, with related exposures, including oil services, oil and gas, and offshore shipping, at end-June 2022 comprised 3.2% of its total gross loan book, up slightly from 2.7% in December 2021. We believe that these exposures, and especially around NOK6.1 billion exposure linked to offshore shipping companies, will continue to expose the bank to some degree of earnings volatility, given the dependence to oil investments of the relative performance of the respective clients.

In addition, the bank is exposed to the commercial real estate sector (around 14.6% of gross loans at end-June 2022), a significant part of which is located in the county of Rogaland, where vacancy rates are vulnerable to oil sector related activity and investments. This exposure combined with its sizeable mortgage loan book (around 61.2% of total gross loans as of June 2022), leaves the bank vulnerable to any material decrease in property prices, a feature shared with other Norwegian savings banks. However, we note that around 95% of the bank's mortgage exposures have a loan-to-value (LTV) ratio of less than 85%, which means that the bank can withstand a significant decline in house prices before its credit profile is materially impacted.

In H1 2022 the bank had reversals of NOK77 million, a decrease from total reversals of NOK494 million at year-end 2021. Loan loss provisions stood at -0.06% as of end-June 2022, compared with -0.21% in 2021, reflecting falling credit costs falling from peak levels recorded in 2020. We expect the bank's loan loss provisions to remain modest going forward, supported by improvements in the oil and offshore sector due to higher investments to more than compensate for model based provisions due to the weakening of the macroeconomic outlook.

Our assigned asset risk score of baa1 reflects the bank's exposure to the oil and offshore sector, the bank's limited geographical diversification and concentration to commercial real estate sector. That said, we view positively the bank's expansion strategy which will gradually improve its regional and sectoral diversification. We note that the bank's exposure to the Oslo and Viken region has increased and now comprises 13.6% of its total loans.

We expect NPLs to decrease over the outlook period but the development to a large extent depending on the development in the oil and offshore sector.

A comfortable capital buffer provides protection from future credit losses

SR-Bank's Common Equity Tier 1 (CET1) ratio was 17.9% and the TCE ratio was 19.3% as of end-June 2022. Moreover, its leverage ratio was a high 7.1% at end-June 2022. The bank's capital metrics compare favourably with other Nordic banks and are significantly higher than the requirement for the CET1 which was 15.85% as of end-June 2022. While capital requirements were eased during the pandemic, rules in Norway continue to be conservative. Furthermore it has been announced that the countercyclical capital buffer will increase from 1.5% to 2.0% by 31 December 2022 and 2.5% by March 2023. On April 29 the bank's pillar 2 requirement was reduced by 0.1%-point which will increase the requirements to 15.6% by Q1 2023.

SR-Bank's CET1 internal target as of end-June 2022 included a 1.25% management buffer above the capital requirement (see Exhibit 4) and this was met with a comfortable headroom. The new internal capital target based on the higher capital requirements and a higher pillar 2 guidance of 1.25% is to be above 16.85%, which the bank already meets. The bank has managed to accumulate capital through increased profitability in the last few years, through conservative growth and modest dividend payout (dividend policy of around 50% of annual profit). Consequently, we believe that the bank has significant loss absorption buffers, and is well positioned and capitalised to continue developing its leading position in South-Western Norway, and expand further in the Oslo region based on its strategic direction.

Exhibit 4

SpareBank 1 SR-Bank CET1 development

Source: Company reports and presentations, Moody's Investors Service

Resilient pre-provision income provide strong capital generation capacity

The bank's net interest margin (NIM) remained unchanged at 1.35% in the first half of 2022 compared with the same period last year. Furthermore, SR-Bank's net interest income in 2021 was around 3.7% lower compared to 2020. However, Norges Bank has continuously hiked interest rates since mid-2021, with the current rate being 2.25%, and these hikes have largely translated to increased mortgage rates while deposit rates have remain flat. Further rate hikes are expected to continue throughout 2022 and 2023 will help alleviate pressure on the NIM and help strengthen earnings going forward.

In 2020 and the beginning of 2021 net income was also negatively affected by the increased cost of risk driven both by the oil and offshore sector, the need for provisioning due to the pandemic, as well as the implementation of a new definition of default.

The bank's return on equity in Q2 2022 was 12.0%, down from 13.2% in Q2 2021 (see Exhibit 5) and more comparable to pre-pandemic results.

Exhibit 5

SpareBank 1 SR-Bank's NIM, CoR and RoE evolution

Source: Company reports and presentations

SR-Bank's cost efficiency remained favorable with a low reported cost-to-income ratios of 42.3% as of end-June 2022. However, its operating expenses increased by 8.0% year-on-year related to higher staff cost, mainly due to higher variable pay due to a stronger performance, and integration cost related recent acquisitions. We note that the bank has ambitious plans in new technology and development in order to improve its product offering and customer experience, which to some degree could exert upward pressure on its IT-related expenses.

Our Profitability Score of baa1 for SR-Bank reflects our view that the bank's oil-related exposure and restructured loans has decreased it continue to pose downside risks to its bottom line also going forward, despite a recent reprieve in the sector.

Reliance on market funding renders it vulnerable to fluctuations in investor sentiment...

While SR-Bank benefits from solid access to domestic and international capital markets, with a stronger footing than some of its local peers, providing a good funding diversification, its reliance on wholesale funding remains high. Market funds accounted for around 31% of tangible banking assets as of end-June 2022 which we believe renders the bank susceptible to potential shifts in investor sentiment.

SR-Bank also benefits from a good deposit base, which represented around 50% of total liabilities as of end-June 2022. Deposits from customers increased by around 6.9% year-on-year as of end-June 2022 driven by both a growth in corporate deposits and a change in consumer behaviour following the pandemic but also clients saving because of low consumer confidence. The bank's gross loans-to-deposit ratio, including transferred loans, was relatively high at around 167% as of end-June 2022, unchanged from year-end 2021.

We reflect the relative stability of covered bonds compared to unsecured market funding through a standard adjustment in our scorecard. Covered bonds have become an increasingly important source of funding for the bank. SR-Bank issues covered bonds through its wholly owned covered bond company SR-Boligkreditt AS and no longer utilises the specialised companies owned jointly with other members of the SpareBank 1 Alliance.

Our Funding Structure Score reflects our view that although SR-Bank has benefitted from strong access to domestic and international capital markets, its high reliance on market funding – a common feature of Nordic banks – is a source of risk. We believe that in times of market stress, market funding can become more expensive and/or restricted.

...although a robust liquidity position partly mitigates market funding concerns

A mitigating factor to the bank's reliance on market funds is its robust liquidity buffer. The bank reported the buffer stood at NOK 48.9 billion or around 17% of tangible banking assets at end-June 2022 consisting mainly of cash, short-term repos, and covered bonds rated Aaa. This liquidity buffer could cover the bank's normal operations for around 27 months, in the event of closed markets that would not allow the bank to refinance its maturing debt. In addition to the liquidity buffer, the bank has NOK22.0 billion in home mortgages ready to be used for new covered bond funding.

The bank reported a liquidity coverage ratio (LCR) of 151% at end-June 2022, combined with a net stable funding ratio (NSFR) of 126%.

Environmental, social and governance considerations

In line with our general view of the banking sector, SR-Bank's has relatively low exposure to Environmental risks and moderate exposure to Social risks. See our [Environmental](#) and [Social](#) risk heatmaps for further information.

SR-Bank's exposure to oil and off-shore sector is a source of environmental risk for the bank, in the face of eventual transition to a low-carbon economy. However, the bank's oil-related exposure, although higher than local peers, is considered manageable at 3.2% of gross lending (including covered bond entities) as end-June 2022.

We believe banks face moderate social risks. The most relevant social risks for banks arise from the way they interact with their customers. Social risks are particularly high in the area of data security and customer privacy, which is partly mitigated by sizeable technology investments and banks' long track record of handling sensitive client data. In addition, we regard the coronavirus outbreak as a social risk under our ESG framework, given the substantial implications for public health and safety. See our [social risk heat map](#) for further information.

Governance is highly relevant for SR-Bank, as it is to all players in the banking industry. Corporate governance weaknesses can lead to a deterioration in a company's credit quality, while governance strengths can benefit its credit profile. Corporate governance remains a key credit consideration and requires ongoing monitoring. However, we currently do not have any governance related concerns over SR-Bank.

Support and structural considerations

Loss Given Failure analysis

The EU Bank Recovery and Resolution Directive (BRRD) has entered into force as of 1 January 2019 in Norway, which confirms our current assumptions regarding LGF analysis. For our resolution analysis, we assume residual tangible common equity of 3% and losses post-failure of 8% of tangible banking assets, a 25% run-off in "junior" wholesale deposits, a 5% run-off in preferred deposits, and assign a 25% probability to deposits being preferred to senior unsecured debt. These are in line with our standard assumptions. BRRD2 will formally enter into effect in June 2022 but current requirements set by the Norwegian FSA already reflect the new regulation.

For SR-Bank's long-term deposit rating, senior unsecured debt rating and junior senior debt rating, our LGF analysis considers the combination of the bank's junior deposits, its outstanding debt volume and the amount of debt subordinated to this. This reflects our expectation that the bank will issue non-preferred senior debt both to comply with the MREL requirement but also considers the bank's need for a buffer above the requirement itself.

For junior securities issued by SR-Bank, our LGF analysis confirms a high level loss-given-failure, given the small volume of debt and limited protection from more subordinated instruments and residual equity. We also continue to include additional downward notching from the BCA reflecting coupon suspension risk ahead of a potential failure.

Government support considerations

SR-Bank has a sound franchise in the county of Rogaland, south-west Norway, with a 35% market share. The bank has also expanded into neighbouring counties, but its national market share in lending is around 4-5%. As a result of the implementation of the BRRD legal framework in Norway from 1 January 2019, which is aligned with that of the EU, we revised our government support assumption for the bank's senior preferred debt and deposits to low from moderate. This has resulted in no rating uplift from its PRA, positioning the ratings at A1.

Counterparty Risk Assessment

SpareBank 1 SR's CR Assessment is A1(cr)/Prime-1(cr)

SR-Bank's CR Assessment is A1(cr)/Prime-1(cr), three notches above the bank's adjusted BCA of baa1, based on the substantial cushion against default provided to the senior obligations represented by the CRA by subordinated instruments. The main difference with our Advanced LGF approach used to determine instrument ratings is that the CRA captures the probability of default on certain senior obligations, rather than expected loss, therefore we focus purely on subordination and take no account of the volume of the instrument class.

Counterparty Risk Ratings (CRR)

SpareBank 1 SR-Bank's CRR is A1/Prime-1

The CRR is three notches above the adjusted BCA of baa1, reflecting the extremely low loss given failure from the high volume of instruments that are subordinated to CRR liabilities.

Foreign currency debt rating

SR-Bank's foreign-currency debt rating of A1 is unconstrained given that Norway has a country ceiling of Aaa.

About Moody's bank Scorecard

Our Scorecard is designed to capture, express and explain in summary form our rating committee's judgment. When read in conjunction with our research, a fulsome presentation of our judgment is expressed. As a result, the output of our Scorecard may materially differ from that suggested by raw data alone (though it has been calibrated to avoid the frequent need for strong divergence). The Scorecard output and the individual scores are discussed in rating committees and may be adjusted up or down to reflect conditions specific to each rated entity.

SEE APPLICABLE MOODY'S RATING SYMBOLS AND DEFINITIONS PUBLICATION FOR INFORMATION ON THE TYPES OF CONTRACTUAL FINANCIAL OBLIGATIONS ADDRESSED BY MOODY'S CREDIT RATINGS. CREDIT RATINGS DO NOT ADDRESS ANY OTHER RISK, INCLUDING BUT NOT LIMITED TO: LIQUIDITY RISK, MARKET VALUE RISK, OR PRICE VOLATILITY. CREDIT RATINGS, NON-CREDIT ASSESSMENTS ("ASSESSMENTS"), AND OTHER OPINIONS INCLUDED IN MOODY'S PUBLICATIONS ARE NOT STATEMENTS OF CURRENT OR HISTORICAL FACT. MOODY'S PUBLICATIONS MAY ALSO INCLUDE QUANTITATIVE MODEL-BASED ESTIMATES OF CREDIT RISK AND RELATED OPINIONS OR COMMENTARY PUBLISHED BY MOODY'S ANALYTICS, INC. AND/OR ITS AFFILIATES. MOODY'S CREDIT RATINGS, ASSESSMENTS, OTHER OPINIONS AND PUBLICATIONS DO NOT CONSTITUTE OR PROVIDE INVESTMENT OR FINANCIAL ADVICE, AND MOODY'S CREDIT RATINGS, ASSESSMENTS, OTHER OPINIONS AND PUBLICATIONS ARE NOT AND DO NOT PROVIDE RECOMMENDATIONS TO PURCHASE, SELL, OR HOLD PARTICULAR SECURITIES. MOODY'S CREDIT RATINGS, ASSESSMENTS, OTHER OPINIONS AND PUBLICATIONS DO NOT COMMENT ON THE SUITABILITY OF AN INVESTMENT FOR ANY PARTICULAR INVESTOR. MOODY'S ISSUES ITS CREDIT RATINGS, ASSESSMENTS AND OTHER OPINIONS AND PUBLISHES ITS PUBLICATIONS WITH THE EXPECTATION AND UNDERSTANDING THAT EACH INVESTOR WILL, WITH DUE CARE, MAKE ITS OWN STUDY AND EVALUATION OF EACH SECURITY THAT IS UNDER CONSIDERATION FOR PURCHASE, HOLDING, OR SALE.

MOODY'S CREDIT RATINGS, ASSESSMENTS, OTHER OPINIONS, AND PUBLICATIONS ARE NOT INTENDED FOR USE BY RETAIL INVESTORS AND IT WOULD BE RECKLESS AND INAPPROPRIATE FOR RETAIL INVESTORS TO USE MOODY'S CREDIT RATINGS, ASSESSMENTS, OTHER OPINIONS OR PUBLICATIONS WHEN MAKING AN INVESTMENT DECISION. IF IN DOUBT YOU SHOULD CONTACT YOUR FINANCIAL OR OTHER PROFESSIONAL ADVISER.

ALL INFORMATION CONTAINED HEREIN IS PROTECTED BY LAW, INCLUDING BUT NOT LIMITED TO, COPYRIGHT LAW, AND NONE OF SUCH INFORMATION MAY BE COPIED OR OTHERWISE REPRODUCED, REPACKAGED, FURTHER TRANSMITTED, TRANSFERRED, DISSEMINATED, REDISTRIBUTED OR RESOLD, OR STORED FOR SUBSEQUENT USE FOR ANY SUCH PURPOSE, IN WHOLE OR IN PART, IN ANY FORM OR MANNER OR BY ANY MEANS WHATSOEVER, BY ANY PERSON WITHOUT MOODY'S PRIOR WRITTEN CONSENT.

MOODY'S CREDIT RATINGS, ASSESSMENTS, OTHER OPINIONS AND PUBLICATIONS ARE NOT INTENDED FOR USE BY ANY PERSON AS A BENCHMARK AS THAT TERM IS DEFINED FOR REGULATORY PURPOSES AND MUST NOT BE USED IN ANY WAY THAT COULD RESULT IN THEM BEING CONSIDERED A BENCHMARK.

All information contained herein is obtained by MOODY'S from sources believed by it to be accurate and reliable. Because of the possibility of human or mechanical error as well as other factors, however, all information contained herein is provided "AS IS" without warranty of any kind. MOODY'S adopts all necessary measures so that the information it uses in assigning a credit rating is of sufficient quality and from sources MOODY'S considers to be reliable including, when appropriate, independent third-party sources. However, MOODY'S is not an auditor and cannot in every instance independently verify or validate information received in the rating process or in preparing its Publications.

To the extent permitted by law, MOODY'S and its directors, officers, employees, agents, representatives, licensors and suppliers disclaim liability to any person or entity for any indirect, special, consequential, or incidental losses or damages whatsoever arising from or in connection with the information contained herein or the use of or inability to use any such information, even if MOODY'S or any of its directors, officers, employees, agents, representatives, licensors or suppliers is advised in advance of the possibility of such losses or damages, including but not limited to: (a) any loss of present or prospective profits or (b) any loss or damage arising where the relevant financial instrument is not the subject of a particular credit rating assigned by MOODY'S.

To the extent permitted by law, MOODY'S and its directors, officers, employees, agents, representatives, licensors and suppliers disclaim liability for any direct or compensatory losses or damages caused to any person or entity, including but not limited to by any negligence (but excluding fraud, willful misconduct or any other type of liability that, for the avoidance of doubt, by law cannot be excluded) on the part of, or any contingency within or beyond the control of, MOODY'S or any of its directors, officers, employees, agents, representatives, licensors or suppliers, arising from or in connection with the information contained herein or the use of or inability to use any such information.

NO WARRANTY, EXPRESS OR IMPLIED, AS TO THE ACCURACY, TIMELINESS, COMPLETENESS, MERCHANTABILITY OR FITNESS FOR ANY PARTICULAR PURPOSE OF ANY CREDIT RATING, ASSESSMENT, OTHER OPINION OR INFORMATION IS GIVEN OR MADE BY MOODY'S IN ANY FORM OR MANNER WHATSOEVER.

Moody's Investors Service, Inc., a wholly-owned credit rating agency subsidiary of Moody's Corporation ("MCO"), hereby discloses that most issuers of debt securities (including corporate and municipal bonds, debentures, notes and commercial paper) and preferred stock rated by Moody's Investors Service, Inc. have, prior to assignment of any credit rating, agreed to pay to Moody's Investors Service, Inc. for credit ratings opinions and services rendered by it fees ranging from \$1,000 to approximately \$5,000,000. MCO and Moody's Investors Service also maintain policies and procedures to address the independence of Moody's Investors Service credit ratings and credit rating processes. Information regarding certain affiliations that may exist between directors of MCO and rated entities, and between entities who hold credit ratings from Moody's Investors Service and have also publicly reported to the SEC an ownership interest in MCO of more than 5%, is posted annually at www.moody.com under the heading "Investor Relations — Corporate Governance — Director and Shareholder Affiliation Policy."

Additional terms for Australia only: Any publication into Australia of this document is pursuant to the Australian Financial Services License of MOODY'S affiliate, Moody's Investors Service Pty Limited ABN 61 003 399 657 AFSL 336969 and/or Moody's Analytics Australia Pty Ltd ABN 94 105 136 972 AFSL 383569 (as applicable). This document is intended to be provided only to "wholesale clients" within the meaning of section 761G of the Corporations Act 2001. By continuing to access this document from within Australia, you represent to MOODY'S that you are, or are accessing the document as a representative of, a "wholesale client" and that neither you nor the entity you represent will directly or indirectly disseminate this document or its contents to "retail clients" within the meaning of section 761G of the Corporations Act 2001. MOODY'S credit rating is an opinion as to the creditworthiness of a debt obligation of the issuer, not on the equity securities of the issuer or any form of security that is available to retail investors.

Additional terms for Japan only: Moody's Japan K.K. ("MJKK") is a wholly-owned credit rating agency subsidiary of Moody's Group Japan G.K., which is wholly-owned by Moody's Overseas Holdings Inc., a wholly-owned subsidiary of MCO. Moody's SF Japan K.K. ("MSFJ") is a wholly-owned credit rating agency subsidiary of MJKK. MSFJ is not a Nationally Recognized Statistical Rating Organization ("NRSRO"). Therefore, credit ratings assigned by MSFJ are Non-NRSRO Credit Ratings. Non-NRSRO Credit Ratings are assigned by an entity that is not a NRSRO and, consequently, the rated obligation will not qualify for certain types of treatment under U.S. laws. MJKK and MSFJ are credit rating agencies registered with the Japan Financial Services Agency and their registration numbers are FSA Commissioner (Ratings) No. 2 and 3 respectively.

MJKK or MSFJ (as applicable) hereby disclose that most issuers of debt securities (including corporate and municipal bonds, debentures, notes and commercial paper) and preferred stock rated by MJKK or MSFJ (as applicable) have, prior to assignment of any credit rating, agreed to pay to MJKK or MSFJ (as applicable) for credit ratings opinions and services rendered by it fees ranging from JPY100,000 to approximately JPY550,000,000.

MJKK and MSFJ also maintain policies and procedures to address Japanese regulatory requirements.
